# WHY MANAGED SERVICES ON AWS?

Because Managed Services helps you operate your AWS infrastructure more efficiently and securely.

While leveraging AWS Services, our Managed Services can augment and optimize your operational capabilities in both new and existing AWS environments.

www.medicineone.net

Medicineone is a Portuguese technology company, dedicated to the development of software for the health market, which migrated its infrastructure to AWS.

To guarantee the maximum costs savings possible, Magic Beans installed monitoring agents obtain metrics for the implemented infrastructure in AWS and analysed 2 weeks of collected data.

Based on our analysis, we implemented FSx to share files between instances in the AWS Cloud.

We also right-sized EC2 instances and EBS volumes, and reserved 1-year instances, which led to cost optimizations.

In terms of infrastructure security, we implemented Amazon Inspector, to verify instances vulnerabilities.

Because of this, Medicineone managed to reduce its costs by 29%, improving efficiency, while obtaining a 24x7 monitorization of their infrastructure and dedicated support from Magic Beans technical team.

Benefits:

- ✓ Customer peace of mind, monitor networking on 24x7x365 basis proactively;
- ✓ Single Point of contact for all issues;
- ✓ Defined Service Levels (SLA's);
- ✓ Avoid costs building own management & reporting system;
