

Why Choosing Cloud Managed Services

Managed Services takes on the responsibility of ensuring that your existing and new cloud environments are secure, reliable, and performing optimally, allowing you to focus on core business without worrying about the complexities of IT management.

 <p>You can focus your efforts on innovating and growing your business, not on operating your multiple cloud environments.</p> <p>→ We take care of them for you. From management to monitoring, optimization and support.</p>	 <p>You can immediately take advantage of the cloud benefits, without needing to reskill or hire specialized talent.</p> <p>→ We function as your company's trusted extension and proactive advisor.</p>	 <p>You won't lose money due to core cloud-based systems unavailability.</p> <p>→ We guarantee their maximum performance, security and reliability - 24/7.</p>	 <p>You will lower TCO, with no surprises. There will be no need to have internal cloud monitoring and management tools, processes and team.</p> <p>→ We ensure cloud consumption control, costs optimization and perfect fit to the needs at each moment.</p>
 <p>You will gain more agility and faster time to market while providing a better experience to your customers and employees.</p> <p>→ We are always attentive and making the necessary recommendations and adjustments.</p>	 <p>You will eliminate risks and comply with existing standards & regulations.</p> <p>→ We mitigate disruptions and downtimes, configuration problems and other vulnerabilities.</p>	 <p>You will get a quick implementation and an agile continuous operation.</p> <p>→ We have all the certified experts required and offer the same flexibility / scalability associated with the cloud usage.</p>	 <p>You will benefit from the latest innovations and state of the art technology.</p> <p>→ We are always attentive to new trends and use predictive models with statistical and machine learning based anomaly detection.</p>

Magic Beans supports all your digital transformation journey providing the expertise and experience you need to accelerate the transition and optimize the ongoing cloud operation, maximizing the business impact.
